

**Stanford
ITS**

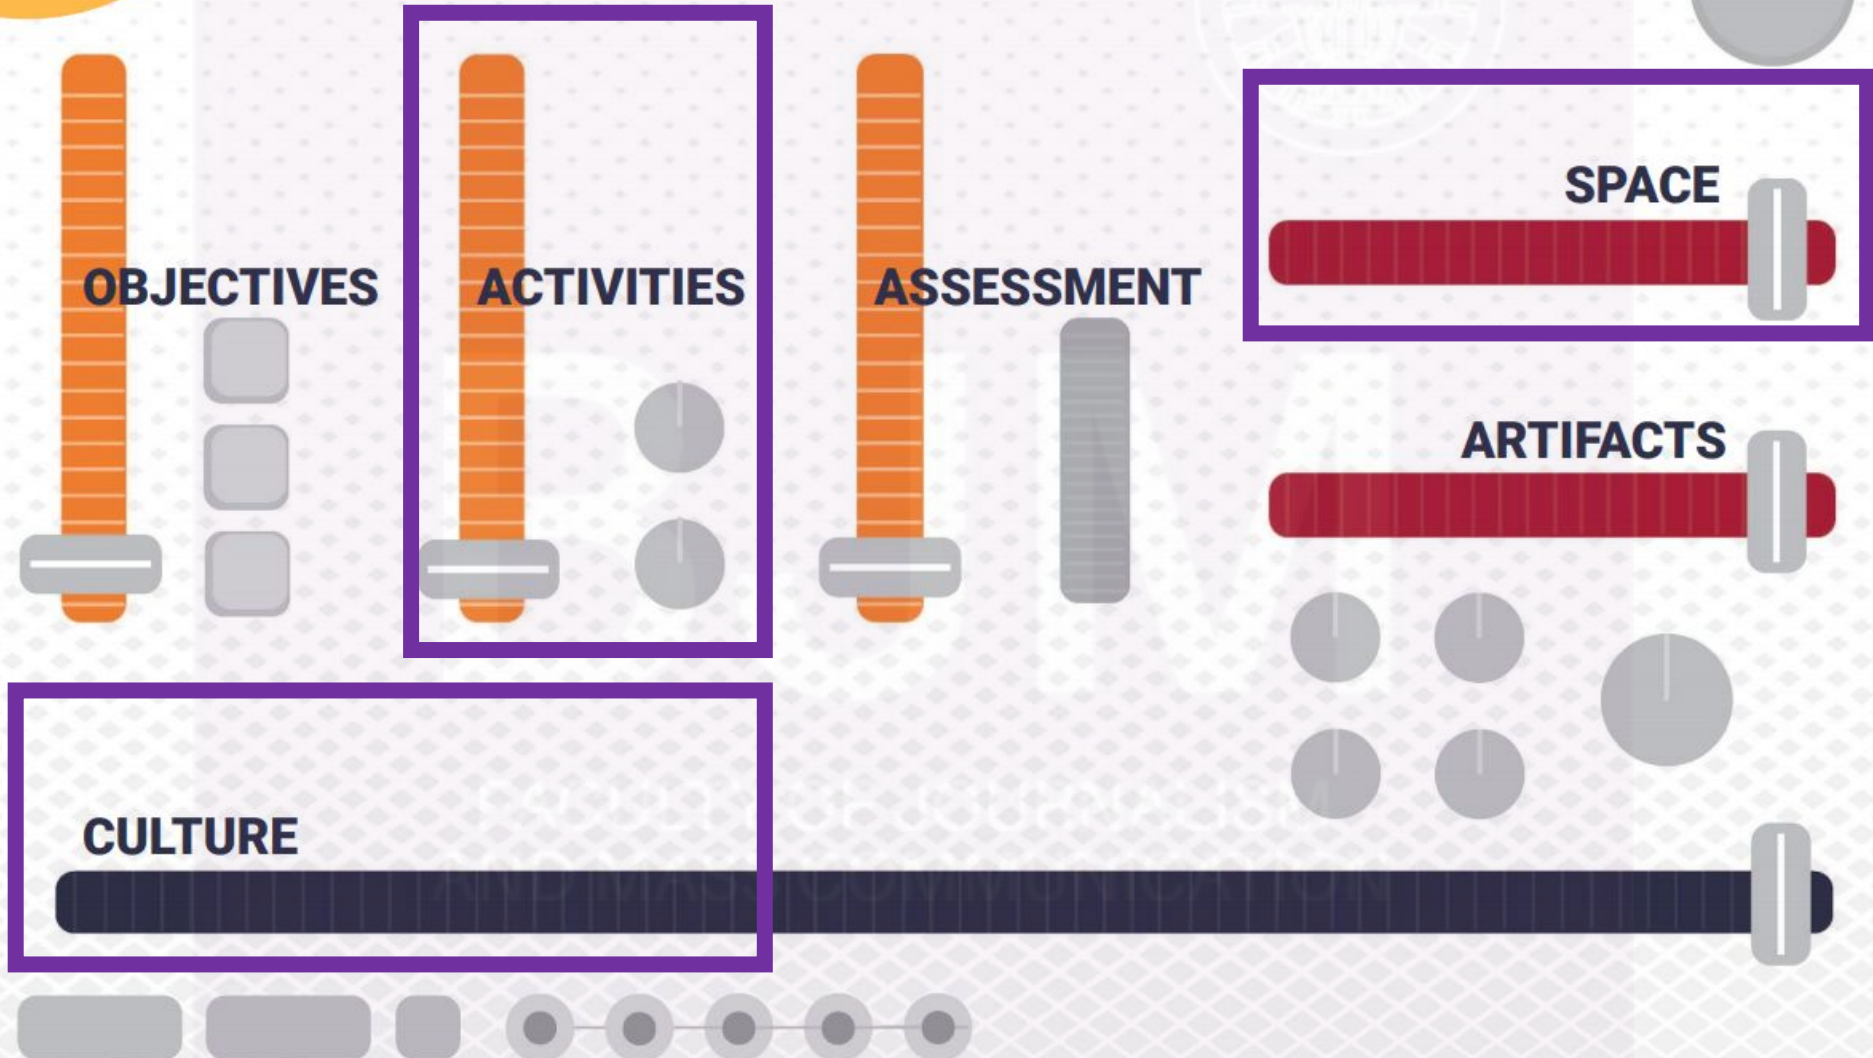

**Experience with
Stanford ITS**

What I teach

- I'm from the USA and have been teaching at Thammasat the past 4 years
- I teach courses in media business management and communication for development
- **I work with NGO's and other media organizations on learning activities (guest lectures, service projects, and role-plays)**
- **ITS has been very helpful with learning more about how these activities help with learning**

PEDAGOGICAL LEVERS

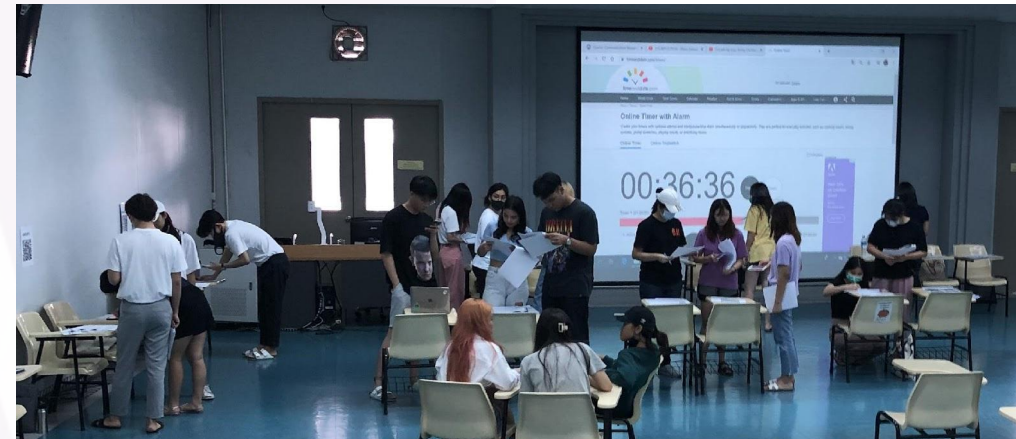

Changed the Classroom space

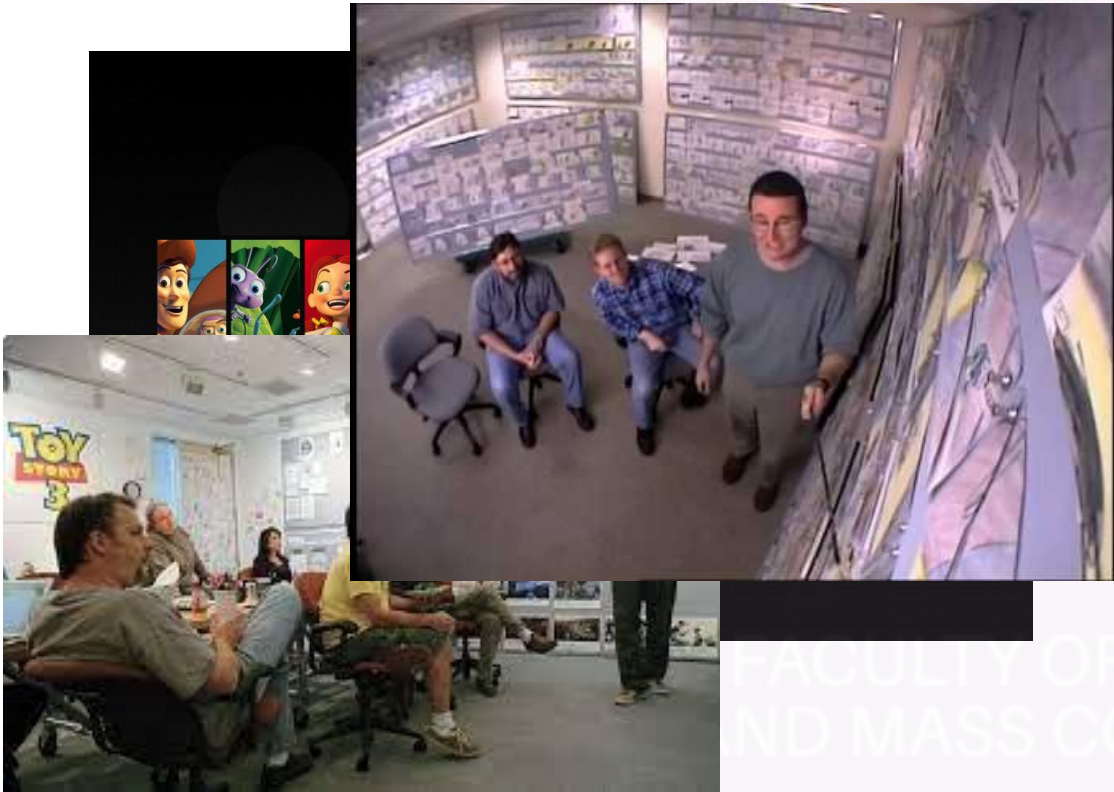

Before

After

Experimented with Team Activities completely online

How students can work with non-profit organizations

Why Stanford ITS is important

- Stanford ITS helped me to experiment with new learning activities
- Most important, ITS program helped me reflect on my own learning activities and **try new things to make the learning experience better for all my students**
- **We always should focus on the experience of the students in our classrooms and what they are really learning**

Thank you
