MANAGEMENT

Three clicks to update your devices

LOGITECH SYNC PLUS : INSIGHTS

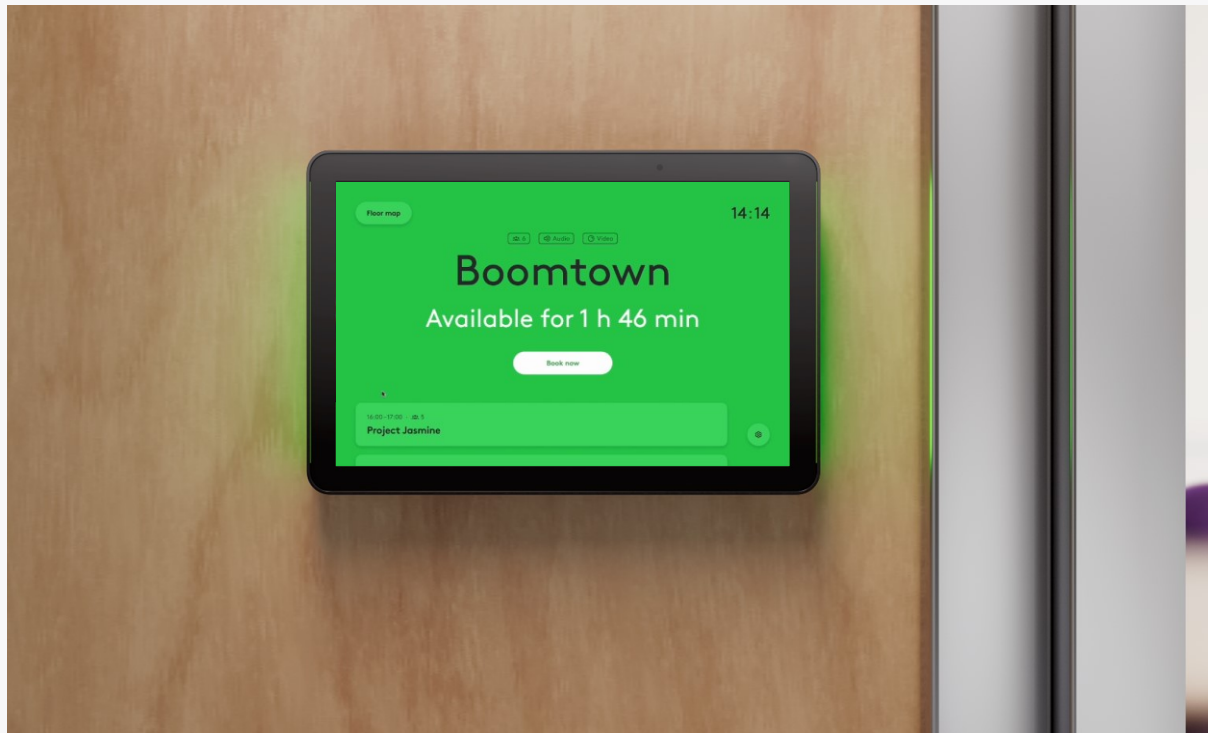

Use analytics on room usage, occupancy, and more to gain a deeper understanding of how your organization meets and to make better use of meeting spaces and real estate.

Insights is now a part of Logitech Select and Sync Plus.

Room Booking

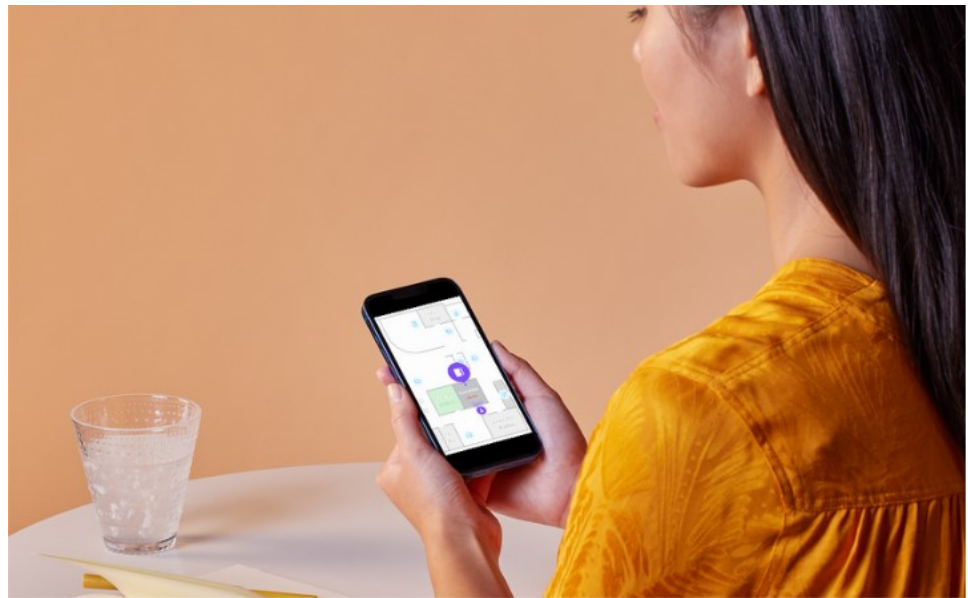

Setup Room Booking and enable employees to find and book their meeting rooms.

- Complete room booking
- Google/Microsoft integration
- Device/policy management
- Mobile and desktop app
- Custom wallpapers
- Insights
- Maps
- Everything in Sync

Final Product: Tune Mobile & Tune Desktop

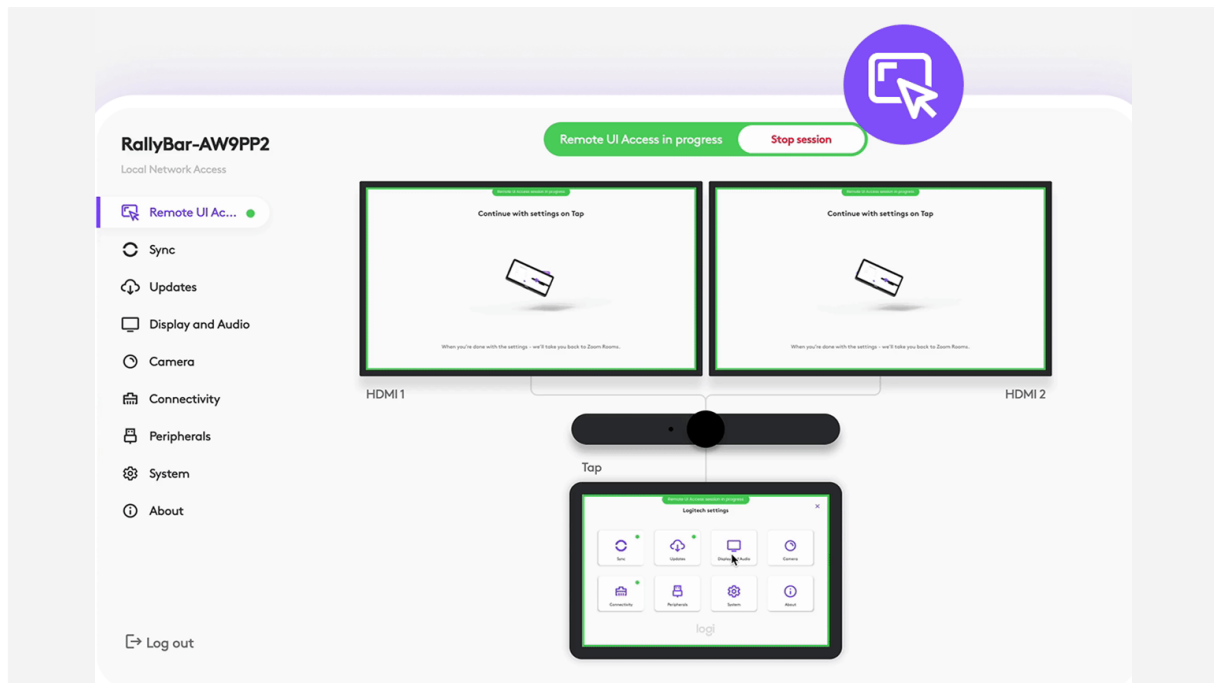

On Tune you will be able to view rooms on maps, check availability, and see what equipment is present.

*Requires a Sync account, and licenses

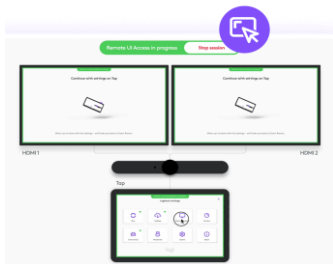

Remote UI Access

Manage devices **without being physically onsite** through Remote UI Access.

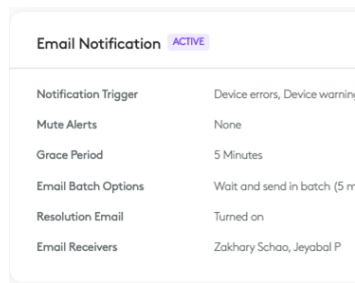

Premium Sync Software

Remote UI Access

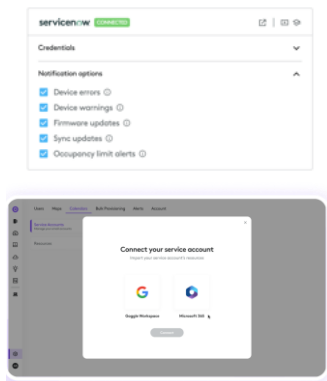

With Sync Remote UI Access (RUA) you can launch a session directly from your browser and get direct access to the device interface.

Alerts

If a device stops working, you will instantly get notified with alerts directly into your inbox.

Integrations

Integrate Sync to your ServiceNow account to get even smoother IT operations.

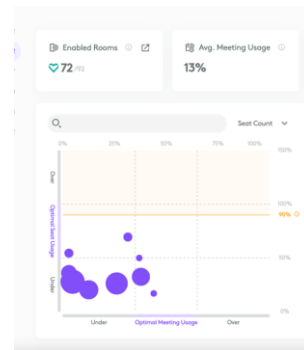

Our integrations with Microsoft 365 and Google Workspace allow you to enable Room Booking.

Room Booking

Logitech Room Booking, designed to work with Tap Scheduler, helps employees find and book meeting rooms quickly and easily.

Insights

Find out how your meeting spaces are being used through the analytics provided in Sync Insights.

CREATING SOLUTIONS WITH LOGITECH

DESIGN FOR SUSTAINABILITY

of Logitech's entire carbon footprint comes from sourcing materials and manufacturing products

decrease in indirect emissions from using low carbon materials, using renewable electricity, and making design modifications

Logitech is committed to
**removing more carbon
than we create by 2030.**
